

Remind is service we use to send out reminders to parents and a way to keep in contact throughout the year. We will send out assignment due dates, test reminders, upcoming important event reminders etc. There is also a chat feature where you can send private messages to the teacher. Parents that actively check their remind messages and use it to keep tabs on their child's progress, often find their year is more successful because they always know what is going on in their child's classes.

Directions:

1. Have your child circle the block they have each teacher below
2. You can download the free Remind app in your app store or simply text the @ code (*see below*) to 81010 on your cell phone
3. Make sure you sign up for each teacher's remind so that you are getting updates for all classes. You will need to do step 2 for each teacher.
4. Mrs. Caruso will send 6th grade general announcements through her remind as well.
5. If your student has their own cell phone they should sign up too. If someone else will be overseeing your child's academic progress, they should sign up as well. If your child travels between homes, make sure someone from both homes are signed up so everyone is on the same page!

Caruso
